

Stretching Hair Gel Slime

Supplies

Corn Starch

Mixing Spoon

Hair Gel (cheaper, the better)

Measuring Cup

Large Bowl

Instructions:

- 1 Measure $\frac{1}{2}$ cup of hair gel and place it into the bowl.
- 2 Mix the hair gel gently for 1 minute.
- 3 Add $\frac{1}{2}$ cup of corn starch to hair gel in mixing bowl.
- 4 Mix all together for 2-3 minutes. How does it feel?
- 5 Now add another $\frac{1}{2}$ cup of corn starch to the mixing bowl and keep mixing. Does the texture feel different? How so? Now once it is mixed well, empty the dough onto the table and take turns kneading it like bread dough.
- 6 Once it is well kneaded divide the up dough, so each person gets a bit to play with.
- 7 When you're done playing with it, store in it a sealed container or bag.
